Cosmo Series

Residential Single-Zone Wall-Mount Split ACs

Cosmo: The Economical and Greener Choice for Single-Zone Cooling and Heating

KEY FEATURES

WiFi Enabled

Control your indoor unit anytime, anywhere using the TOSOT+ app. Enjoy full remote access and scheduling at your fingertips.

Blue Fin Protection

The heat exchange fins are treated with Blue Fin technology, offering enhanced resistance to rust and corrosion. Both the evaporator and condenser feature all-copper coils that are deoxidized for extended durability and performance.

Energy Efficiency

As the budget-friendly option of the collection, the Cosmo Series still delivers impressive performance, with EERs up to 3.72 and COPs up to 4.67—helping you save on energy bills without sacrificing comfort.

Easy Installation

The standard package includes everything needed for installation. Comes with a 16 ft. piping kit, with extended options available for up to 50 ft., making it flexible for various room sizes and layouts.

Quiet Operation

Equipped with a Full DC inverter compressor for smoother, quieter performance and reduced cycling noise. The indoor unit operates as quietly as 24–34 dB—perfect for bedrooms and other quiet spaces.

R32 Refrigerant

Uses R32 refrigerant, which offers higher cooling efficiency and a significantly lower environmental impact—minimizing ozone depletion and global warming potential.

Aoraki Series

Residential Single-Zone Wall-Mount Split AC

Aoraki: A Step Ahead in Comfort, Efficiency, and Air Quality

Experience the perfect fusion of whisper-quiet operation, cutting-edge energy efficiency, and advanced indoor air quality technologies with the Aoraki Series—engineered for smarter, healthier living.

KEY FEATURES

WiFi Enabled

Control your indoor unit anytime, anywhere using the TOSOT+ app. Enjoy full remote access and scheduling at your fingertips.

Smart Humidity Control

Set adjustable humidity levels between 30%–80%. In cooling mode, the unit automatically adjusts humidity based on human comfort. In dry mode, continuous dehumidification removes excess moisture regardless of the weather.

Ultra-Quiet

Enjoy the quietest performance in our single-zone lineup, with indoor noise levels as low as 19 dB. In sleep mode, the outdoor unit operates at a whisper-quiet 40 dB, ensuring a restful environment day and night.

ERV Compatible

Compatible with an optional Energy Recovery Ventilation (ERV) accessory, which circulates fresh outdoor air indoors without needing to open windows or doors. Integrated HEPA filters remove dust and mold for enhanced indoor air quality and health protection.

Industrial-Leading Efficiency

ENERGY STAR® certified and eligible for potential tax rebates. With up to 24.5 SEER2 and 9.5 HSPF2 ratings, the Aoraki Series can reduce energy consumption by up to 59% compared to traditional 20 SEER systems.

Convenient Cleaning & Maintenance

The overhead filter and air outlet are easily removable for direct cleaning. Auto Clean technology uses a multi-step process—including condensation, frosting, sterilization, and defrosting—to remove dirt, eliminate odors, and maintain fresh airflow.

Refrigerant Leakage Sensor

Built-in sensors monitor refrigerant levels and detect any leakage. If a leak is detected, the system automatically triggers a fault alarm and shuts down to prevent further release and potential hazards.

Mini-ERV Fresh Air System

- HEPA Filter
- Sync or Work Independently
- Condensation Protection
- Two-way Ventilation
- 45° Airflow Design
- 7 Fan Speed

Cosmo Series

Residential Multi-Zone Wall-Mount Split ACs

Cosmo Multi-Zone Split AC: One system house all

Flexible heating and cooling for multiple rooms—powered by a single outdoor unit. The Cosmo Multi-Zone system is built for performance, versatility, and energy savings, with extended piping options and reliable operation in extreme temperatures.

KEY FEATURES

ENERGY STAR® Certified

Rated up to 21 SEER2 and 10 HSPF2, the system is ENERGY STAR® certified and may qualify for tax rebates. It delivers up to 24% energy savings compared to conventional 16 SEER2 units.

Individual Comfort

Each indoor unit can be independently controlled, scheduled, and adjusted to the preferred temperature—via remote or the TOSOT+ app—ensuring personalized comfort in every room.

Refrigerant Leakage Sensor

Built-in sensors continuously monitor refrigerant levels. If a leak is detected, the system shuts down automatically and issues a fault alert to prevent further release or damage.

Extra Long Piping

Supports a maximum piping length of up to 100 meters and vertical elevation of 25 meters, enabling flexible installation across large homes or multi-level buildings.

Low ambient Heating & Cooling

Engineered for extreme climates, the system delivers cooling in outdoor temperatures up to 118°F (48°C) and reliable heating down to -22°F (-30°C), making it ideal for all-season comfort.

Cosmo Series Indoor

All indoor units feature the sleek, quiet, and efficient design of the Cosmo Series. Flip to the feature checklist to discover all the advanced functions available across the lineup.

Light Commercial Single-Zone Split Systems

Conceal-Ducted | 8-Way Ceiling Cassette | Floor-Standing

34,000 BTU Floor Standing AC: Powerful Cooling, Sleek Design

KEY FEATURES

Floor Standing Design

Vertically installed for minimal footprint and maximum stability. Ideal for areas where wall or ceiling space is limited—delivers strong performance in a wide range of room layouts.

Strong Airflow

Delivers 880–1,150 CFM of airflow—significantly more than standard wall-mounted units. Adjustable air deflectors direct airflow up to 50 ft., ensuring powerful, even cooling for large rooms or open-plan spaces.

WiFi Enabled

Control your indoor unit anytime, anywhere using the TOSOT+ app. Enjoy full remote access and scheduling at your fingertips.

DC Inverter & R32 Refrigerant

Equipped with a high-efficiency DC inverter compressor and eco-friendly R32 refrigerant. Energy-saving operation reduces power consumption while maintaining optimal cooling performance.

Sleek Design

Features a sleek, seamless front panel with hidden LED display and touch-sensitive controls. When not in use, the air deflectors close completely for a dust-resistant, clean look.

3D Airflow

Multi-directional airflow with intelligent preheating and anti-direct-blow design ensures uniform cooling and enhanced comfort across the entire room.

34,000 BTU 8-Way Ceiling Cassette: Uniform Comfort for Large Spaces

KEY FEATURES

360° Airflow Distribution

Features 8-way air outlets with 7-speed fan control for customized airflow. Wide-angle deflectors on all four sides plus strategically placed corner vents deliver balanced, shower-style air distribution. Provides powerful airflow up to 1,071 CFM—ideal for open or large areas.

Automatic Drainage

An integrated pump actively removes condensate water, enabling flexible installation without the need for gravity drainage. This reduces the risk of ceiling leaks and ensures uninterrupted operation.

Refrigerant Leakage Sensor

Built-in sensors monitor refrigerant levels and detect any leakage. If a leak is detected, the system automatically triggers a fault alarm and shuts down to prevent further release and potential hazards.

Float Switch

Real-time water level monitoring via a built-in float switch. When condensate reaches a critical height, the system triggers an overflow alarm to prevent potential ceiling damage.

34,000 BTU Concealed Ducted Unit: Powerful, Flexible, and Seamlessly Integrated

KEY FEATURES

Automatic Drainage

An integrated drain pump removes the need for gravity-dependent drainage, allowing for more flexible duct routing and slimmer ceiling designs—no continuous downward slope required. Active drainage also reduces the risk of water buildup and ceiling damage.

Installation Flexibility

The standard side return air design can be easily converted to a bottom return. Both return and supply vents can be positioned on the side or bottom, enabling seamless integration with partial or full ceiling structures and diverse architectural layouts.

High Static Pressure Design

Designed for larger spaces and extended duct runs, this unit delivers adjustable external static pressure up to 1.106 in. WC (275 Pa). Ideal for high-ceiling areas and ductwork with multiple branches or bends—perfect for large residences and light commercial environments.

Two Control Options

Easily manage your system via the included wired controller or through your smartphone using the TOSOT+ app. Access customizable modes including sleep, timer, and schedule settings for precise comfort control.

Float Switch Design

A built-in float switch monitors condensate levels in real time. If water reaches a critical level, it triggers an alert via the wired controller. This safety feature works with the drain pump to ensure proper water discharge and prevent ceiling leaks.
